

Step-1: Download any Heart attack prediction data set from online source

Step-2: Preprocess the data set

Step-3: Calculate the following value

Metric	SVM	RF	NB	KNN	Hybride-1
Accuracy					
Precision					
Recall					
F1-score					

NOTE: Prepare hybride-1 model by selecting two model based on highest accuracy

Step-4: Draw ROC Curve and Confusion Matrix of proposed Hybride-1 Model

Step-5: Draw the Histogram based on above data that is given in table using Matplot Lib
